Where country-level evidence is recorded

276 country–program pairs across 121 country/territory units and 18 inventory records

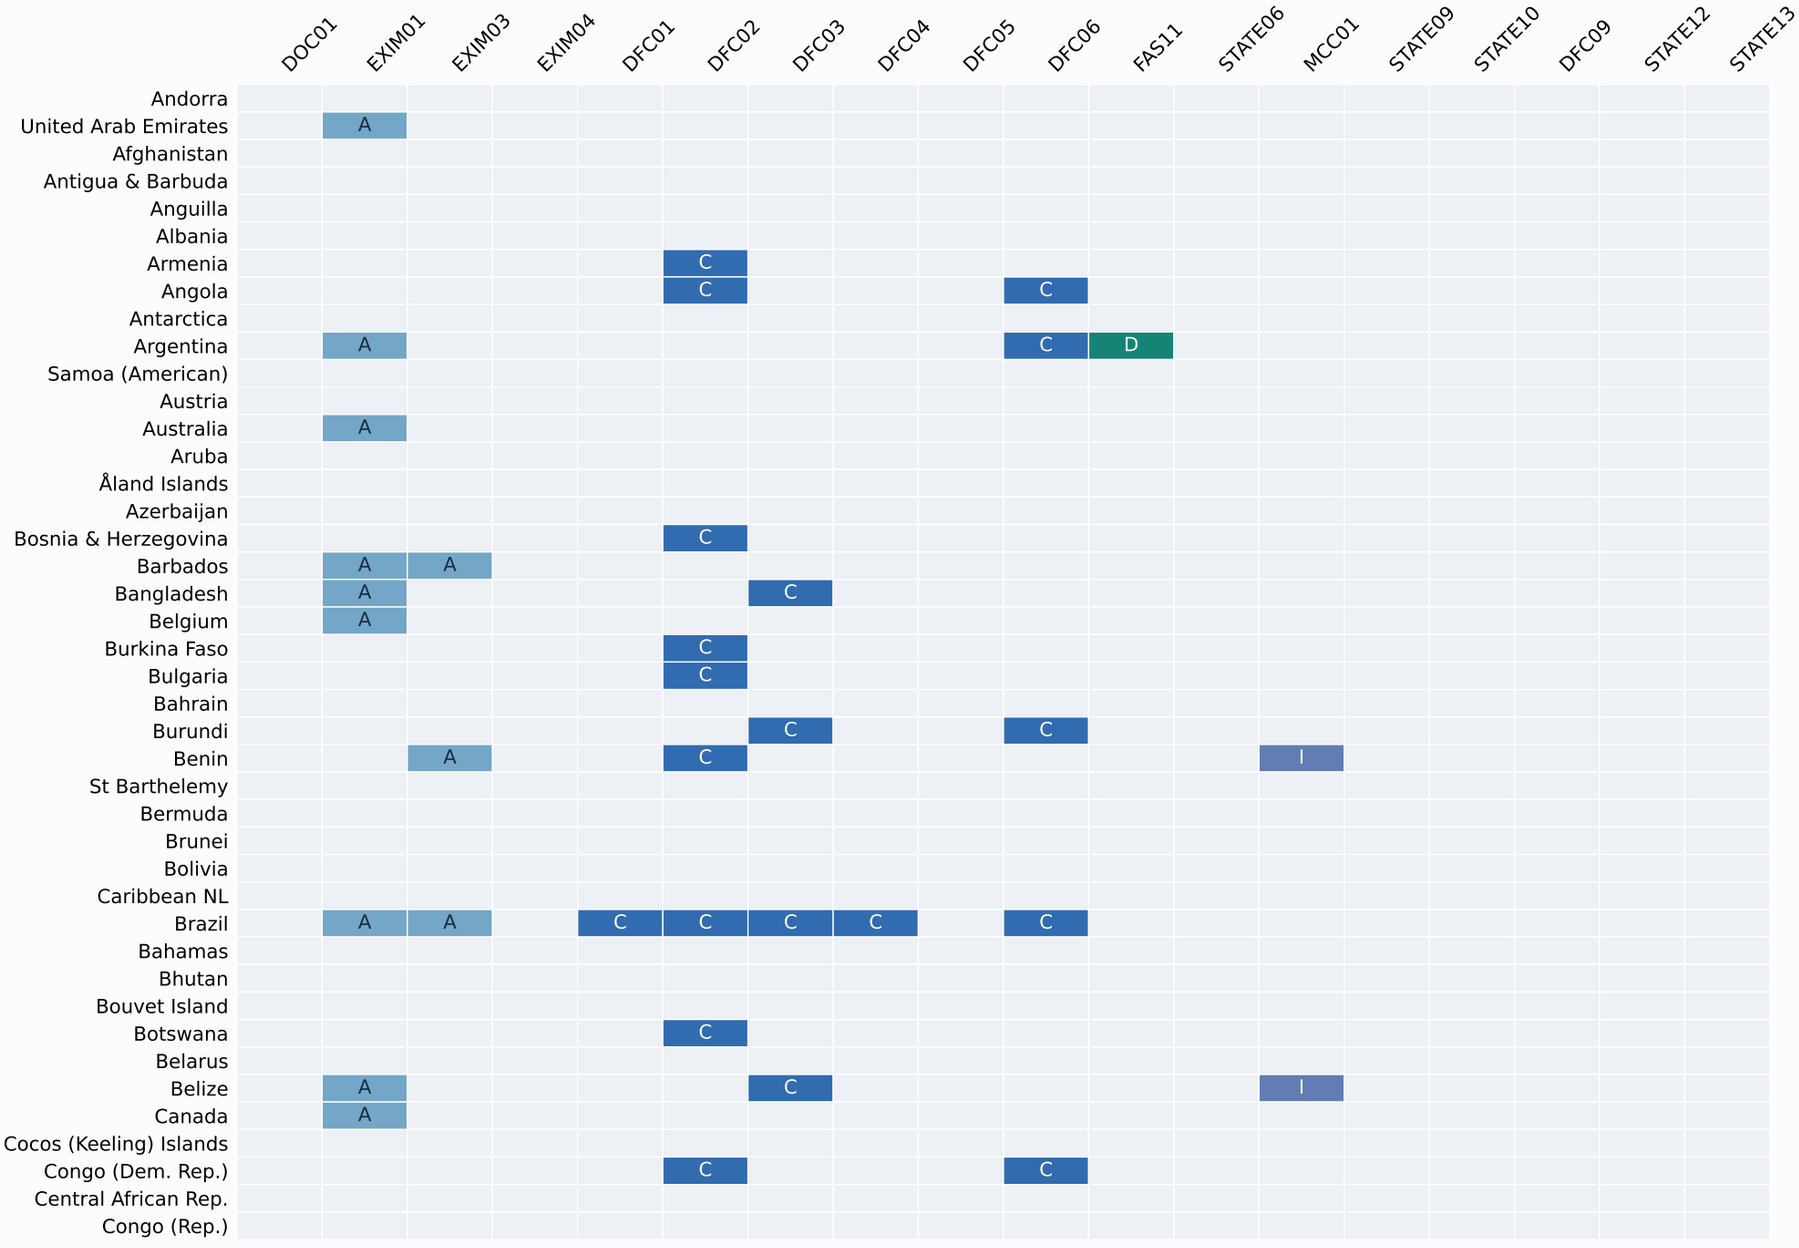

Counts combine authorizations, commitments, reported delivery and MCC implementation. They do not measure deals, spending or impact.

US excluded (white). Not an official participant map. Small territories omitted at this scale; all 249 units remain in data. Natural Earth geometry.

Country evidence matrix 1/6

All country/territory units • 18 columns with observations; 92 additional columns remain unresolved in the full CSV

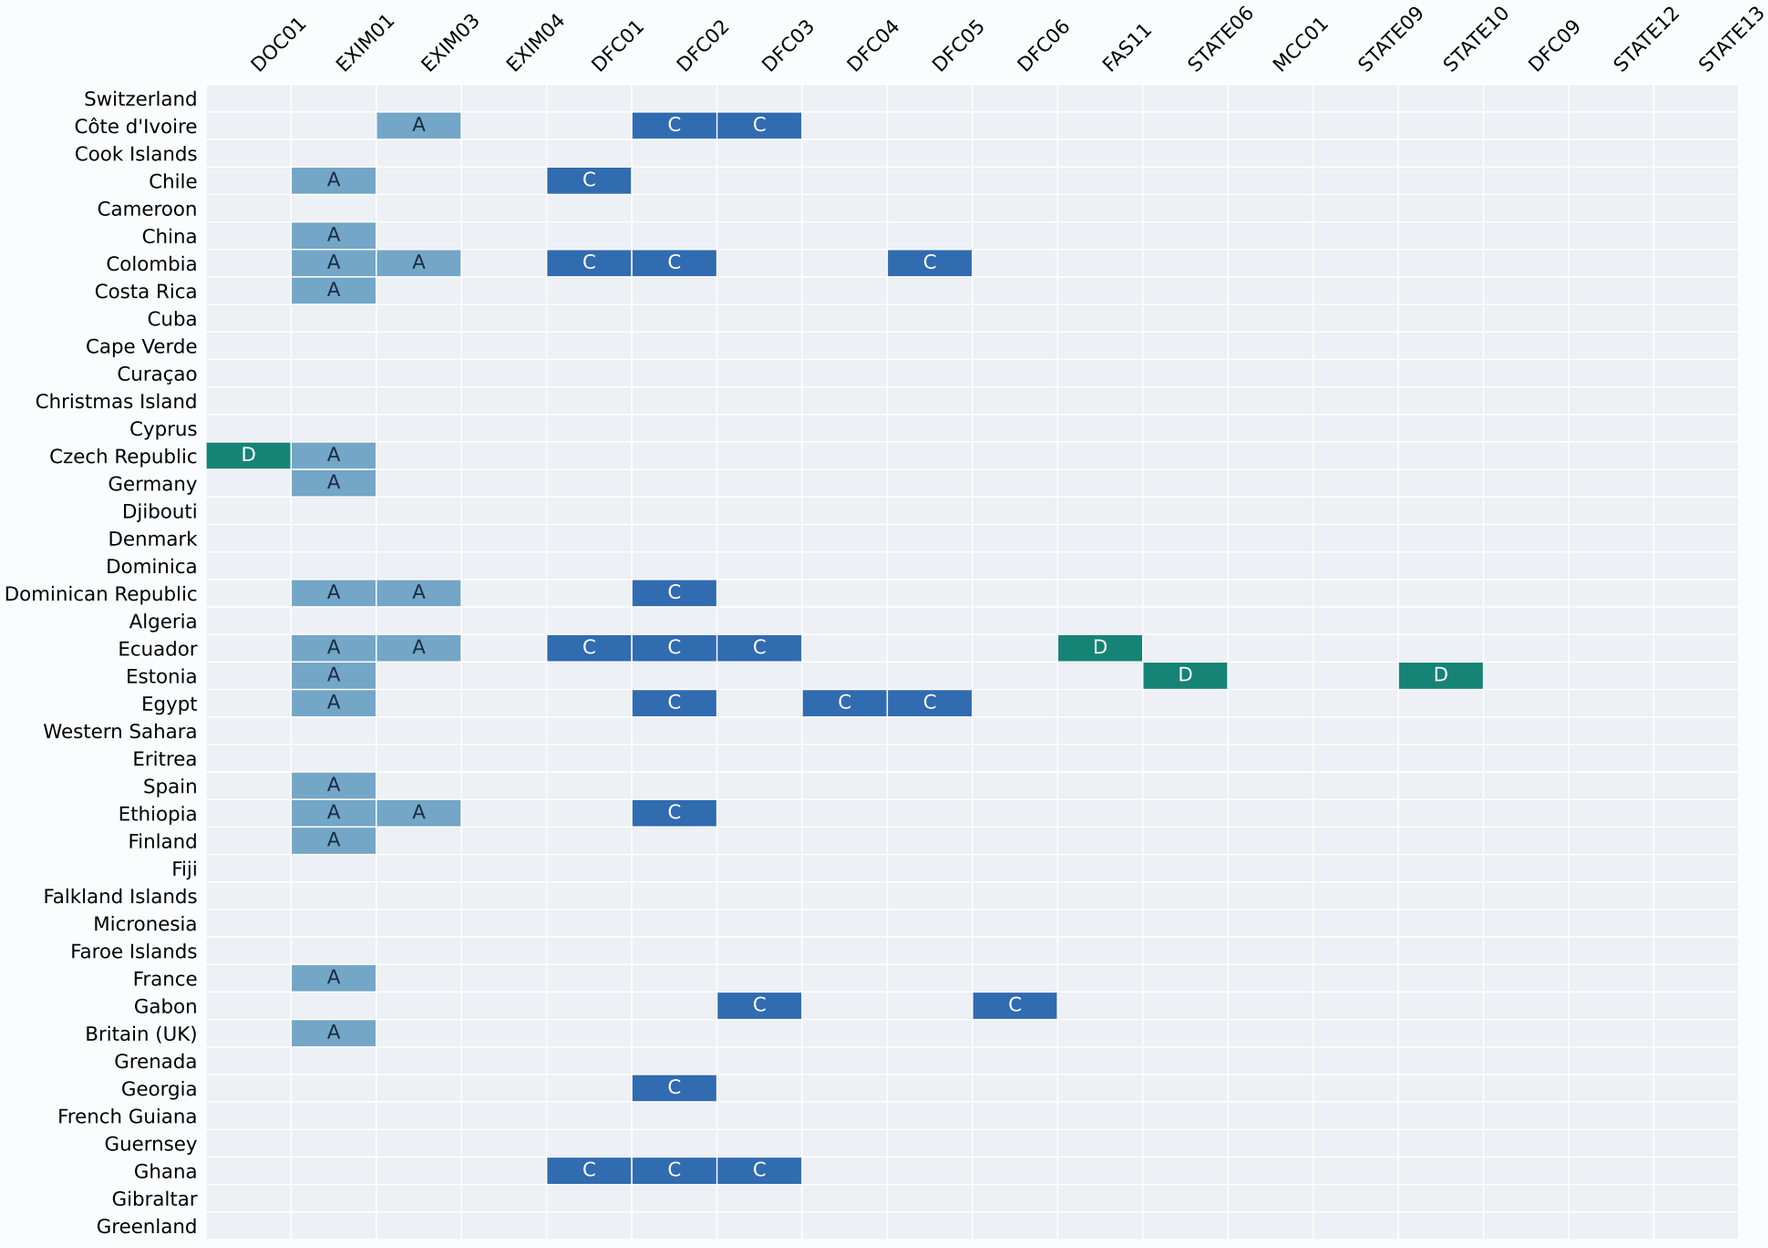

D reported delivery I MCC implementation roster C commitment / signed financing A EXIM authorization

Light cells: no qualifying observation. Source dates vary; observed financing is not proof of ongoing service delivery.

Program names and sources are in the key and country_program_status_v13.csv. Full stage history is retained separately.

Country evidence matrix 2/6

All country/territory units • 18 columns with observations; 92 additional columns remain unresolved in the full CSV

D reported delivery I MCC implementation roster C commitment / signed financing A EXIM authorization

Light cells: no qualifying observation. Source dates vary; observed financing is not proof of ongoing service delivery.

Program names and sources are in the key and country_program_status_v13.csv. Full stage history is retained separately.

Country evidence matrix 3/6

All country/territory units • 18 columns with observations; 92 additional columns remain unresolved in the full CSV

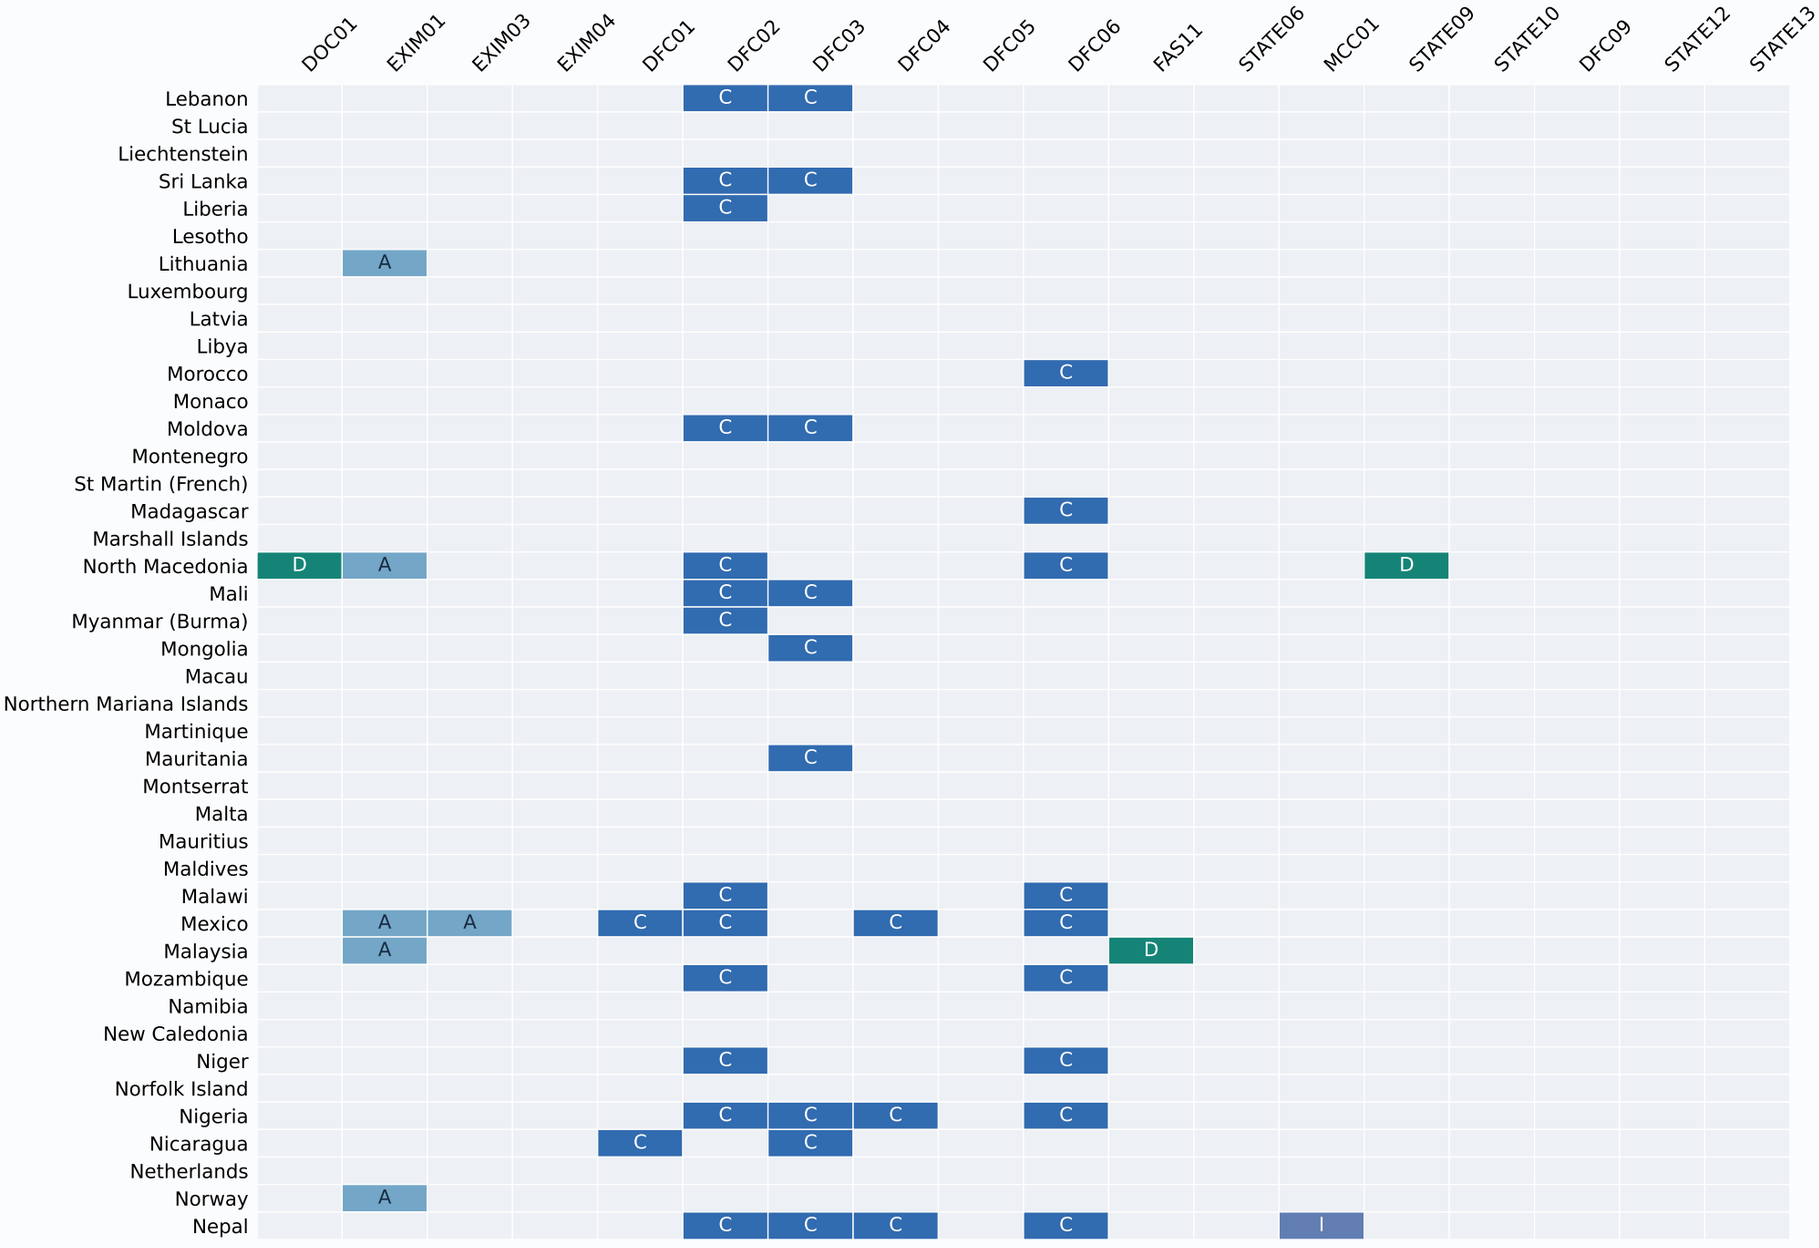

D reported delivery I MCC implementation roster C commitment / signed financing A EXIM authorization

Light cells: no qualifying observation. Source dates vary; observed financing is not proof of ongoing service delivery.

Program names and sources are in the key and country_program_status_v13.csv. Full stage history is retained separately.

Country evidence matrix 4/6

All country/territory units • 18 columns with observations; 92 additional columns remain unresolved in the full CSV

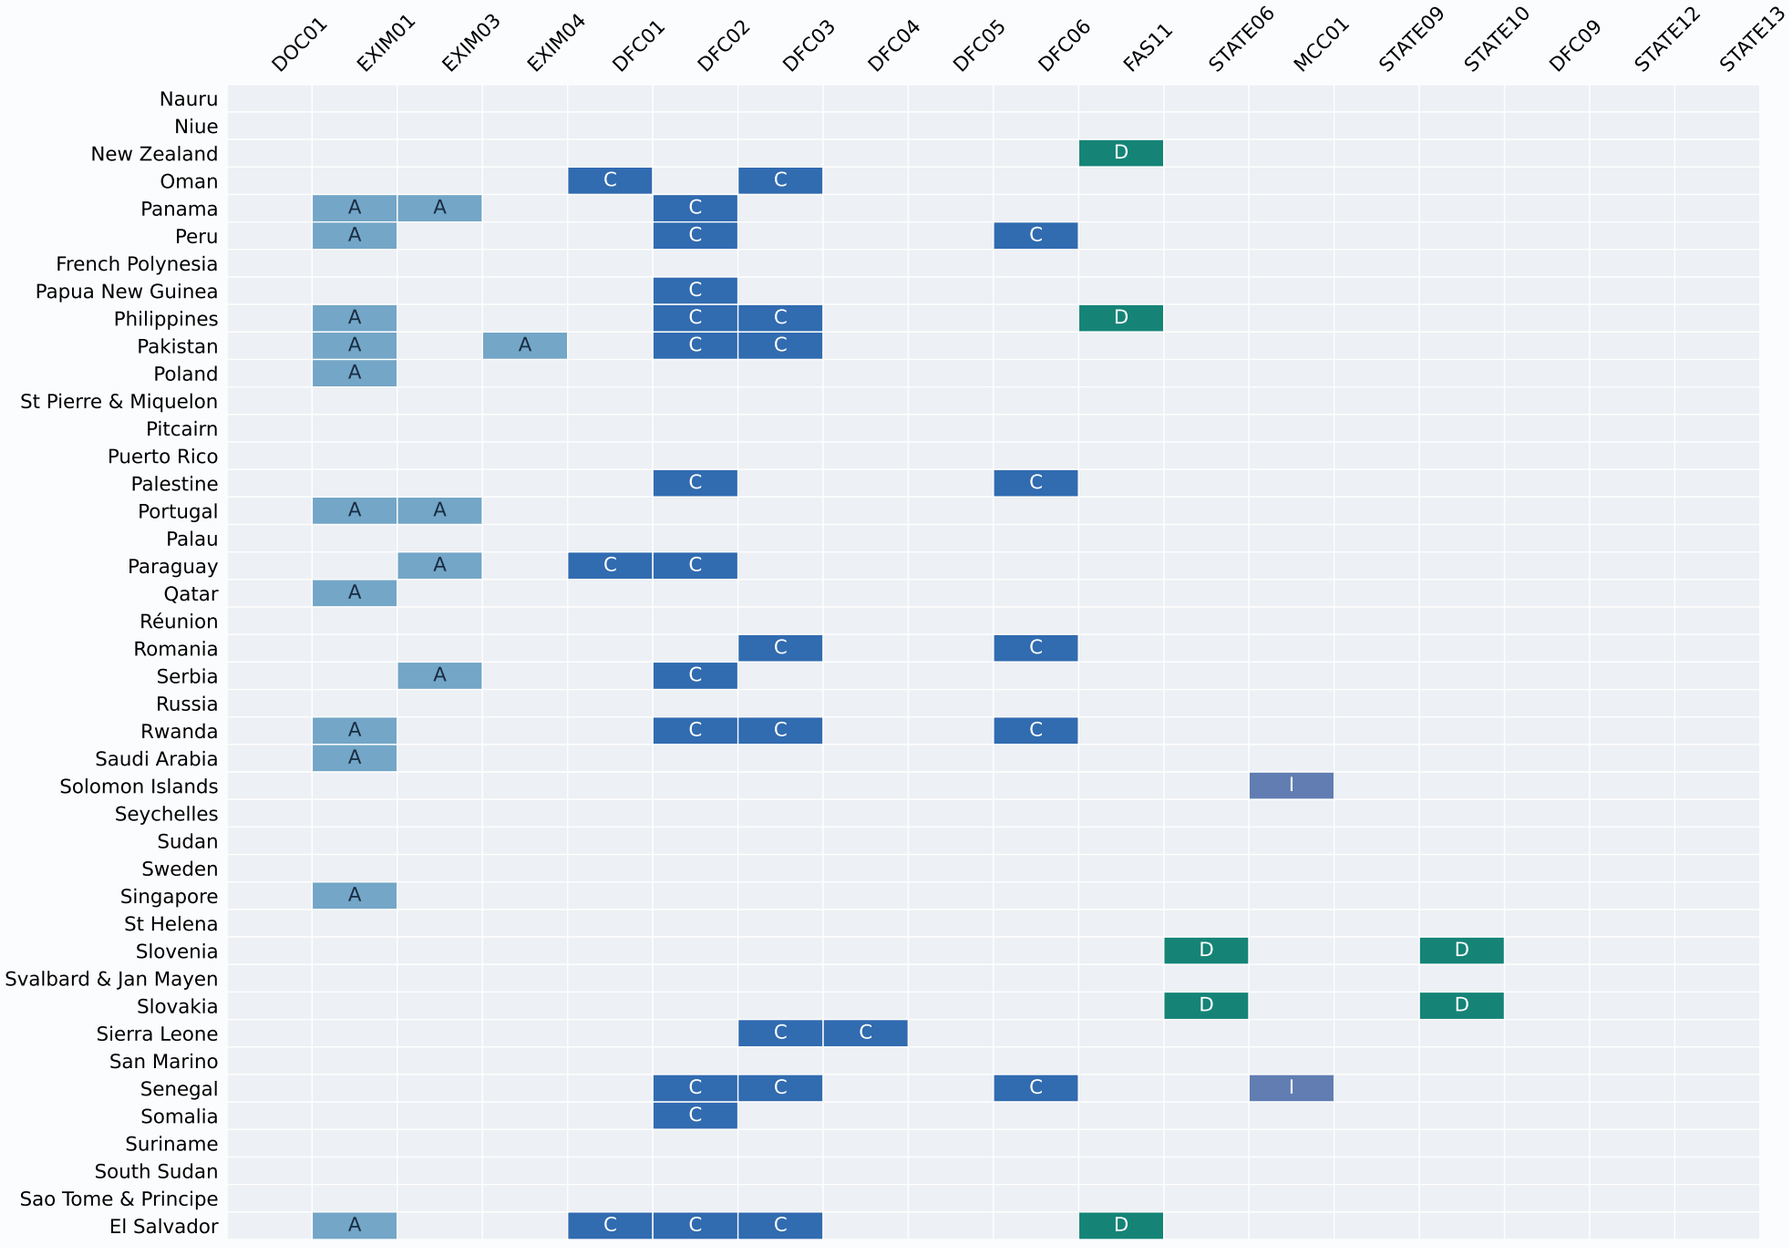

D reported delivery I MCC implementation roster C commitment / signed financing A EXIM authorization

Light cells: no qualifying observation. Source dates vary; observed financing is not proof of ongoing service delivery.

Program names and sources are in the key and country_program_status_v13.csv. Full stage history is retained separately.

Country evidence matrix 5/6

All country/territory units • 18 columns with observations; 92 additional columns remain unresolved in the full CSV

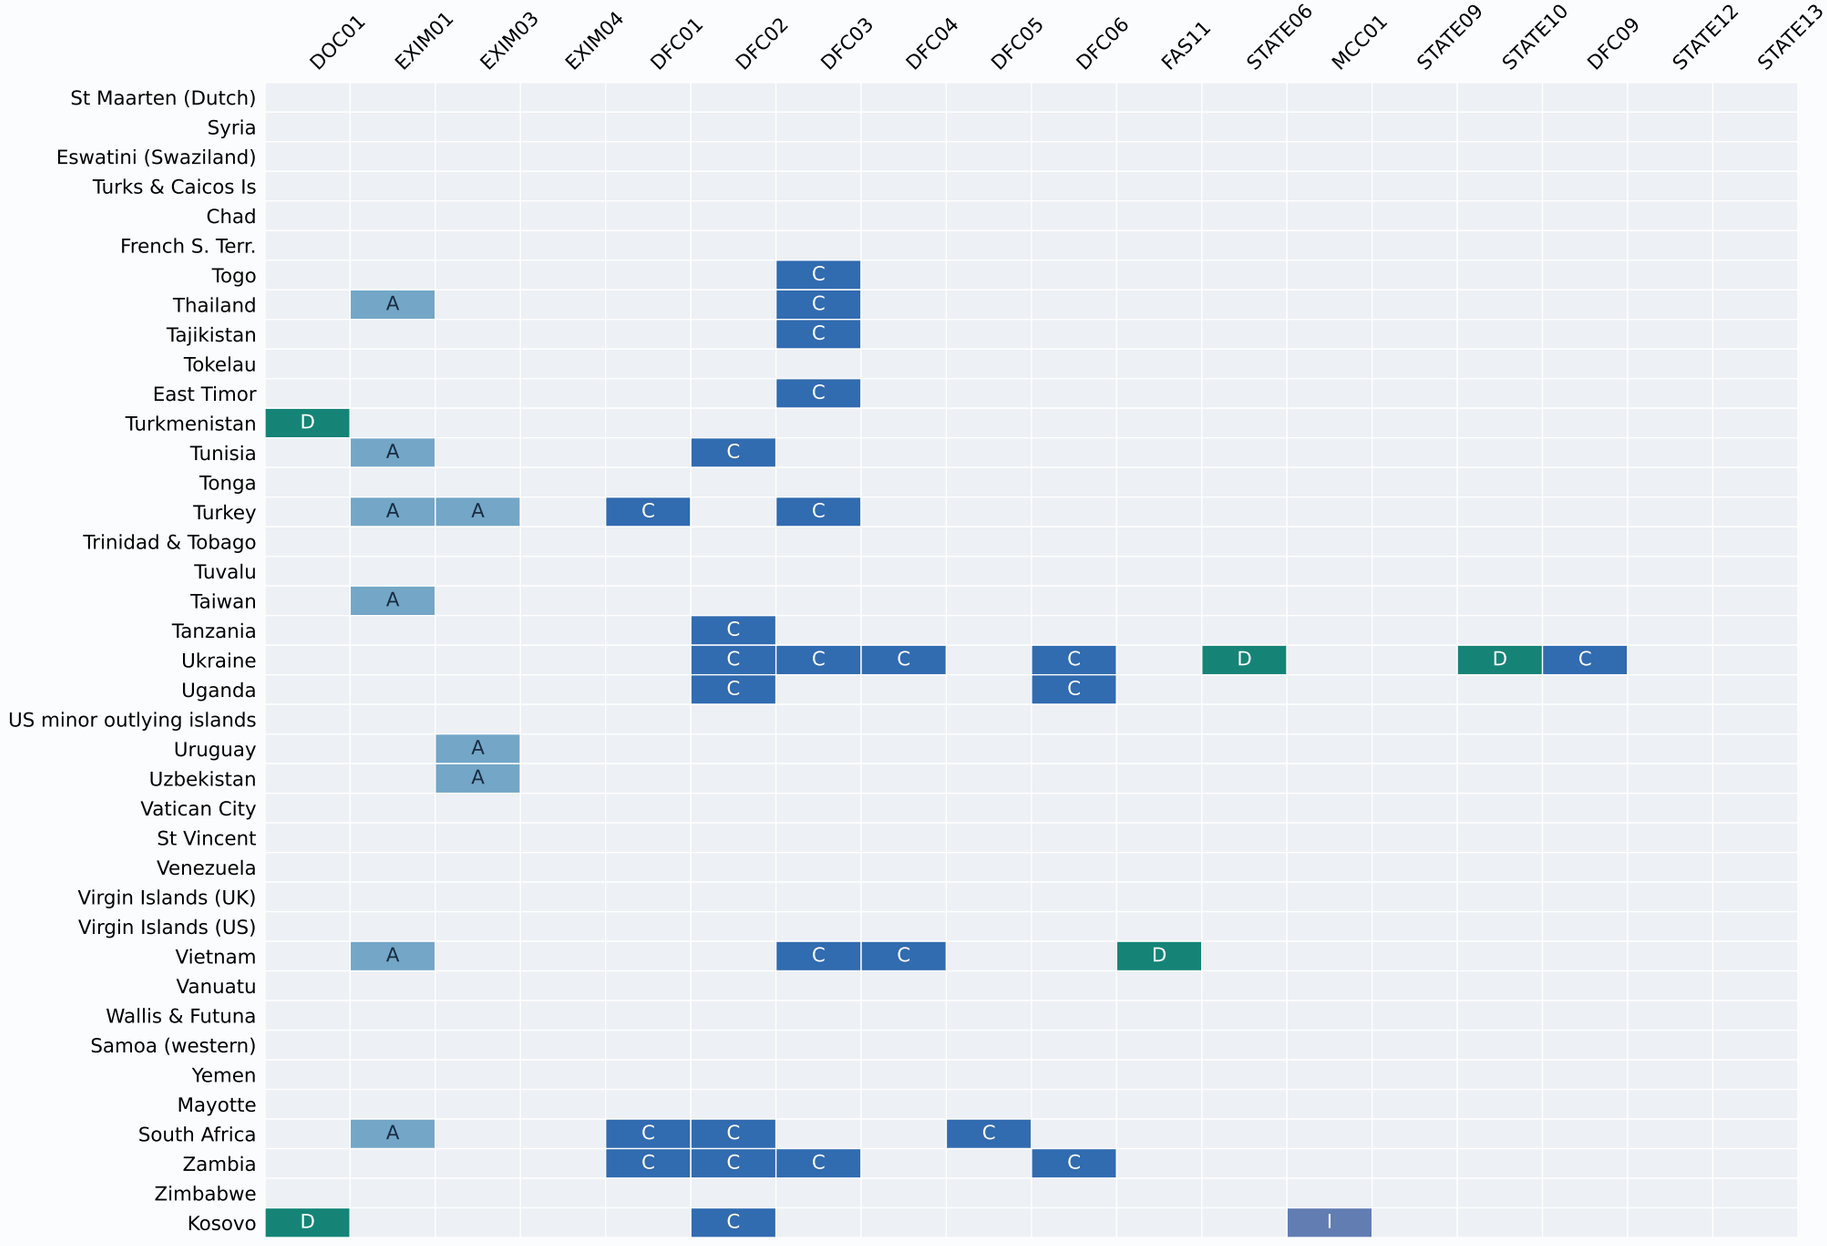

D reported delivery I MCC implementation roster C commitment / signed financing A EXIM authorization

Light cells: no qualifying observation. Source dates vary; observed financing is not proof of ongoing service delivery.

Program names and sources are in the key and country_program_status_v13.csv. Full stage history is retained separately.

Country evidence matrix 6/6

All country/territory units • 18 columns with observations; 92 additional columns remain unresolved in the full CSV

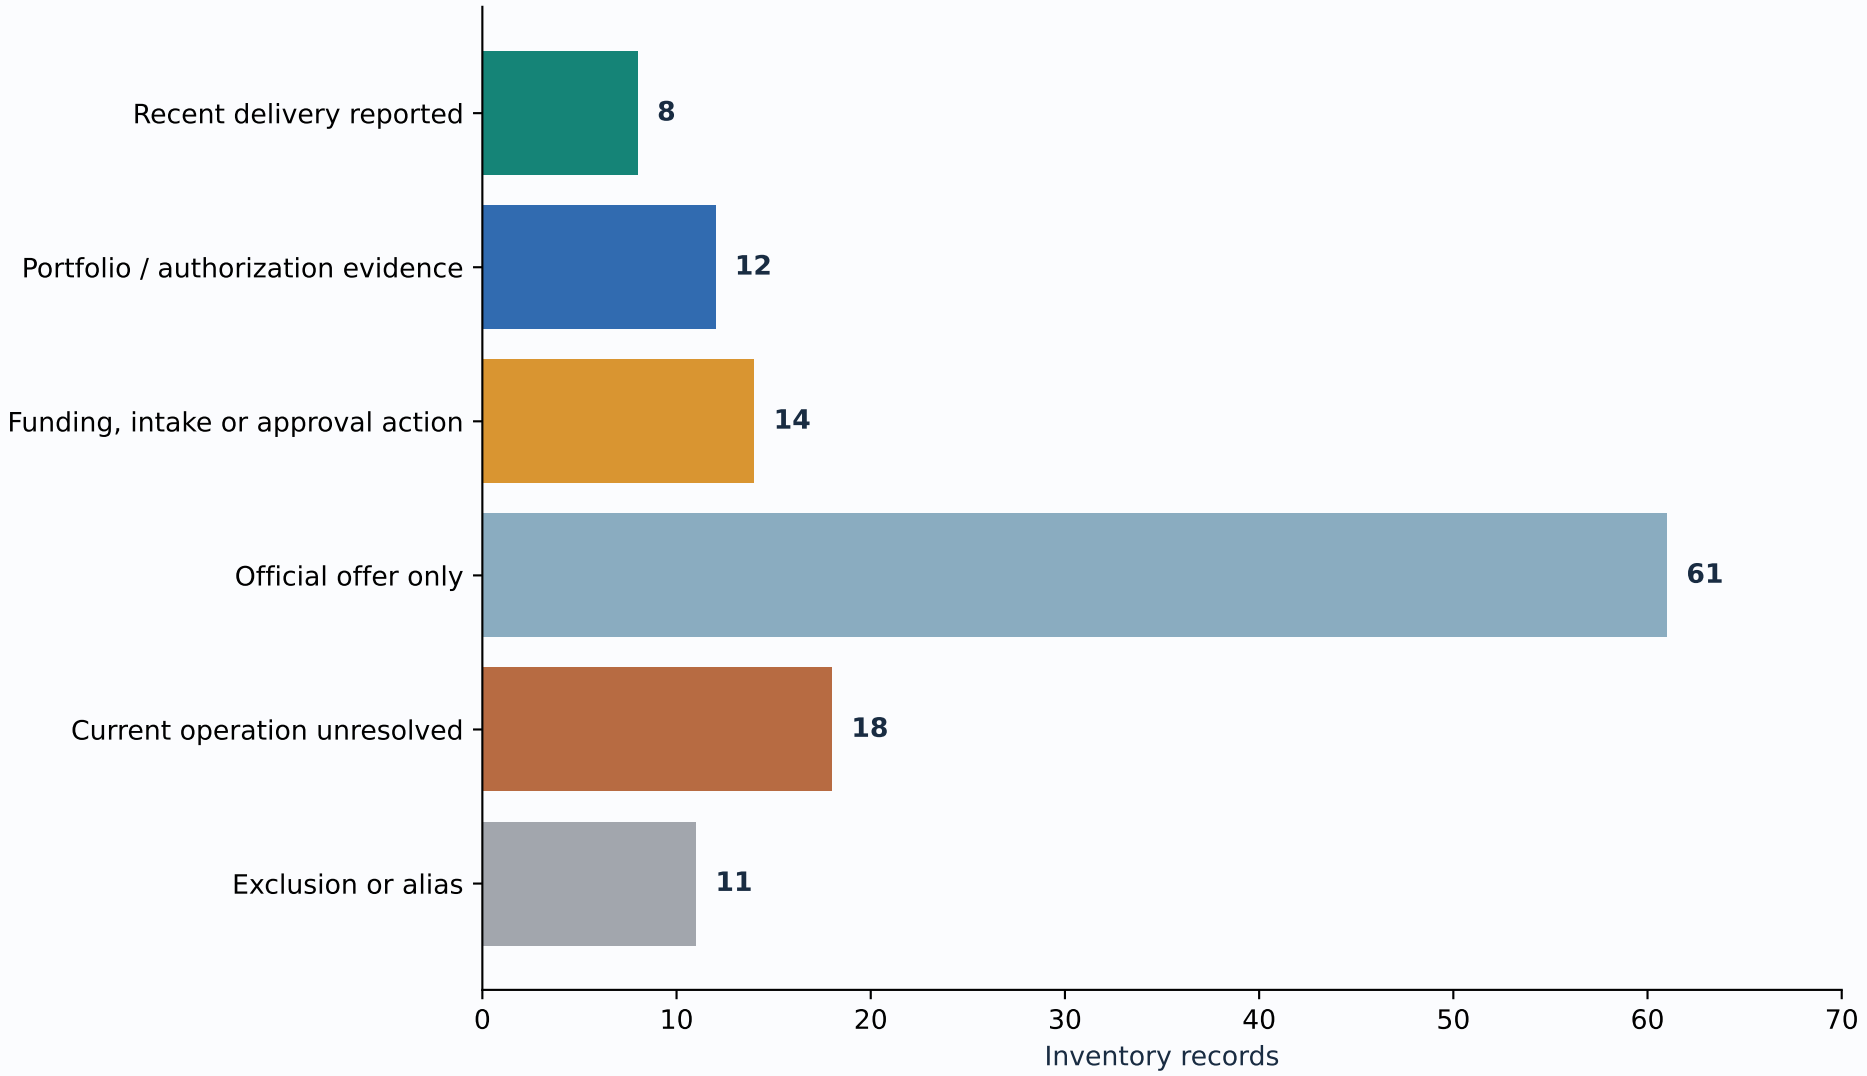

D reported delivery I MCC implementation roster C commitment / signed financing A EXIM authorization

Light cells: no qualifying observation. Source dates vary; observed financing is not proof of ongoing service delivery.

Program names and sources are in the key and country_program_status_v13.csv. Full stage history is retained separately.

What the program-level evidence establishes

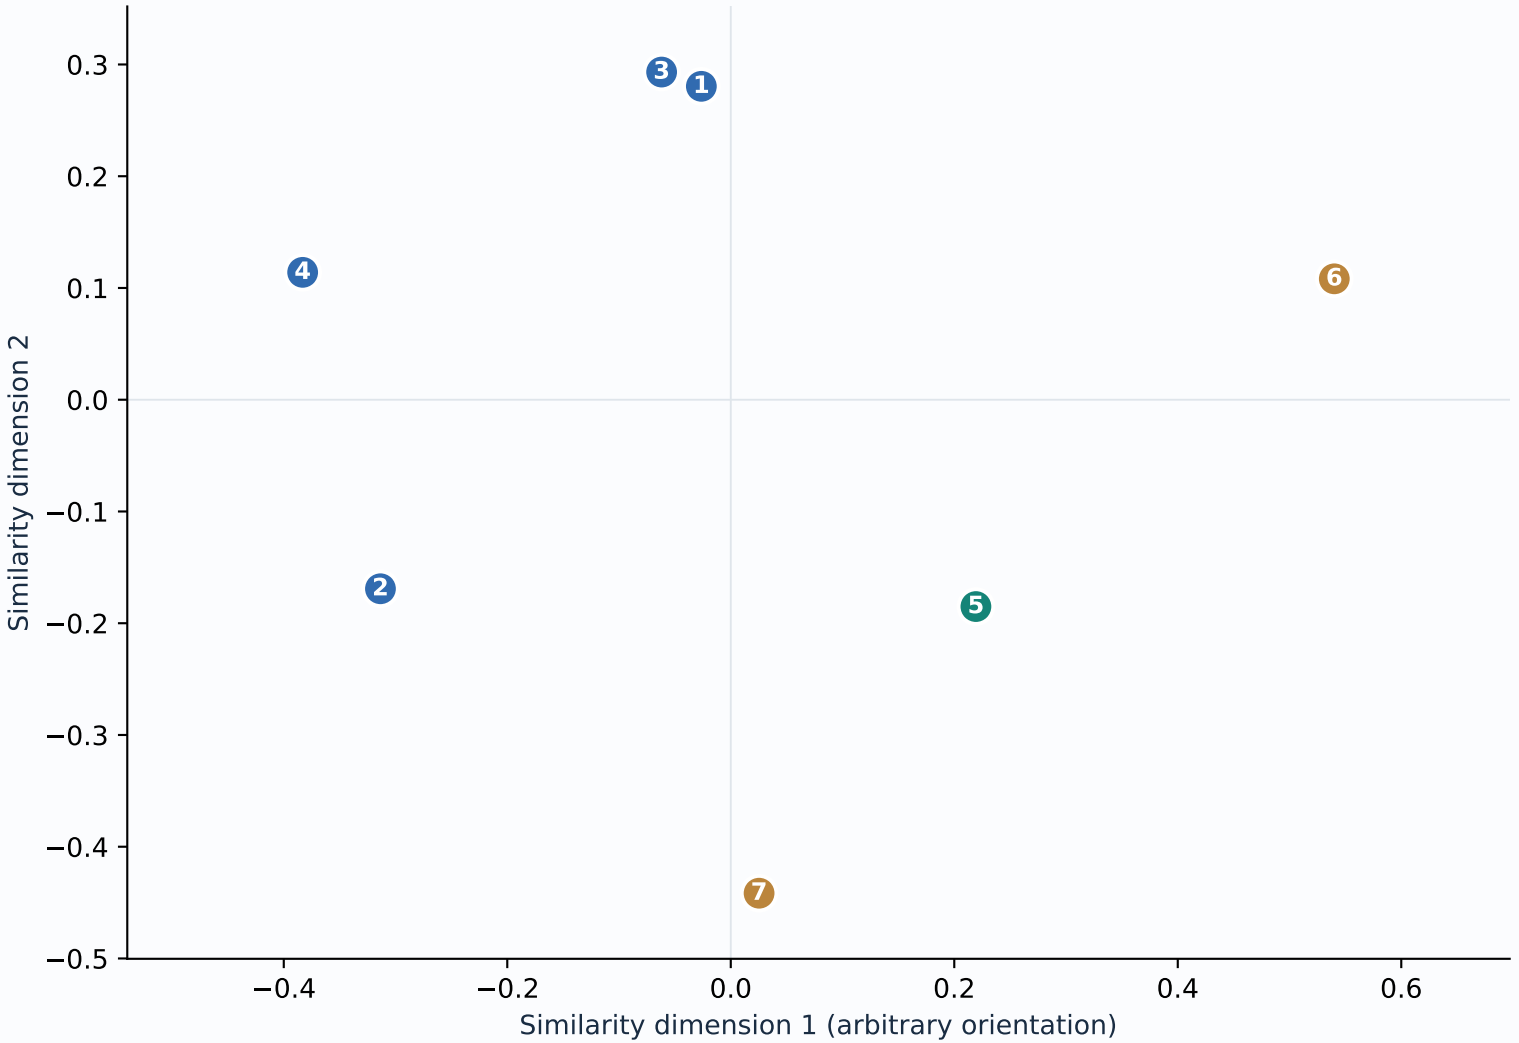

124 screened records; evidence categories are not a count of independently verified active programs

Source: program_census.csv operational_evidence. An official offer, financing action and reported delivery are distinct claims.

Exploratory similarity: geographic routes and scope

13 of 62 direct instruments; 7 distinct profiles • equal geography/scope weights • normalized stress 0.215

1 EXIM01
broad goods services

2 EXIM03, EXIM05
capital goods related services

3 EXIM04
broad goods services

4 EXIM06
engineering preproject services

5 DFC01, DFC02, DFC03, DFC04, DFC05, DFC06
multisector project

6 FAS01
agriculture food

7 DOD01
defense articles services

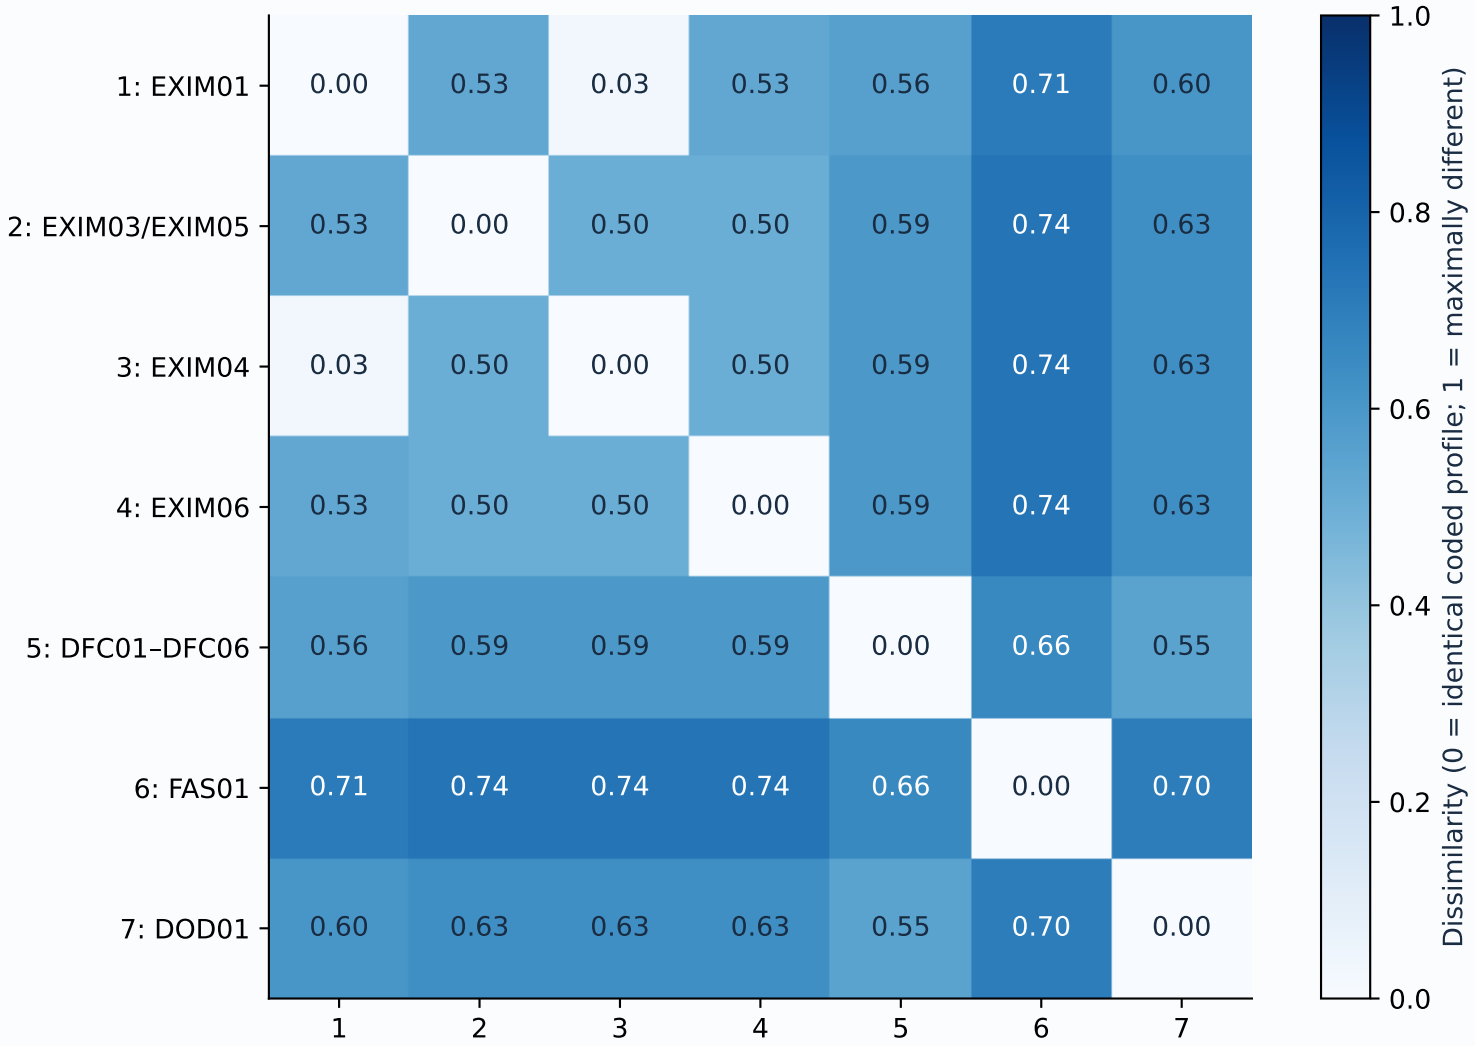

Distances describe documented eligibility routes and broad scope, not actual operations, budgets, performance or substitution.

Approximate projection (stress 0.215): use the distance matrix for exact comparisons. 49 excluded tools remain in the scope chart.

Model: 70% country-coverage threshold; categorical mismatch distance; deterministic multi-start 2-D fit. Full pair distances and weight sensitivity in data/.

Exact dissimilarities behind the projection

Equal-weight geographic-route and scope mismatch; omitted countries are not coded as zero

These profiles are coarse: identical DFC geography/scope does not mean identical financial products, activity or sector portfolios.

Geographic rule and scope: all 62 direct instruments

Categorical comparison retains tools excluded from the numerical projection; position is not a measured distance

	Affected export market	Award and activity market	Certificate-specified markets	Domestic client and exports	Event destination	Fiscal destination schedule	Government purchaser	Local or designated market	Obligor country risk	Project location

Historical termination, scheduled end date and current survival are separate. Exact IDs and provenance: legacy_award_survival_v11.csv.

Overseas networks and embassy affiliation

Agency-network evidence is separate from program availability, current staffing and delivery

CS = Commercial Service; FAS = Foreign Agricultural Service. Categories overlap and must not be added.

Zero means no qualifying directory evidence in this collection, not no overseas presence. DFC and USTDA leads retain weaker codes.

Source: country_program_evidence.csv, deduplicated by country/network; directory snapshots are not an agency-certified current staffing roster.

Country matrix key and evidence guide

IDs identify inventory records, which may include overlapping instruments or initiatives

DOC01	Commercial Law Development Program
EXIM01	Export Credit Insurance
EXIM03	Medium- and Long-Term Loan Guarantee
EXIM04	Direct Loan
DFC01	Debt
DFC02	Guaranties
DFC03	Political Risk Insurance
DFC04	Equity
DFC05	Platforms and Funds
DFC06	Project Development
FAS11	Agribusiness Trade Missions
STATE06	Foundational Infrastructure for Responsible Use of SMR Technology FIRST
MCC01	Compact / Threshold / Regional program procurement and private-sector engagement
STATE09	Digital Connectivity and Cybersecurity Partnership DCCP
STATE10	Project Phoenix
DFC09	United States Ukraine Reconstruction Investment Fund
STATE12	Power Sector Program
STATE13	Japan US Mekong Power Partnership JUMPP

A: EXIM FY2026 Q3 authorization data; credit-risk geography.

C: DFC June 30, 2026 active portfolio and cited financing announcements; project geography.

D: dated agency/implementer/recipient reports; delivery venue or specifically supported destination.

I: MCC Where We Work implementation label; not independently verified construction.

Country evidence rows retain source URL, record ID, date, geographic role and inclusion decision.

The full status CSV also shows conditional eligibility, historical/terminated projects, pipeline and unresolved cells.

No source establishes a universal official “Trade over Aid participant” country roster.

Legacy awards and unresolved current ownership are tracked independently of country activity.

Numerical similarity compares geographic rules and scope only. Identical profiles are grouped, not jittered.

Primary data: data/country_activity_ledger.csv; source_registry_v11.csv; post_notice_review_v12/research/evidence; research_v13/uploaded_records.
